TERTIARY INFOTECH ACADEMY PTE LTD

Activity 03

Prioritise the Defect Pattern with Pareto Analysis

Continuous Process Improvement with FMEA · TGS-2021009031

Scenario

Orion has 240 inspection records across products, shifts and printing machines but anecdotes point in different directions.

Objective

Gather, validate and interpret production information to focus the investigation.

Deliverable

Clean defect log, frequency summary, cumulative percentage and interactive Pareto chart

Scenario questions

1. What is the leading defect and how much of the total does it represent?

2. Which stratum shows the strongest signal, and what limitation remains?

Submission checklist

✓	Check
■	Workbook complete
■	Formulas retained
■	Evidence and assumptions recorded
■	Questions answered
■	Acceptance criterion applied

Acceptance criterion: The Pareto counts reconcile to the source, cumulative percentage reaches 100%, and the conclusion distinguishes priority from cause.
