Activity 04

Verify Root Causes with Fishbone, 5 Whys and Fault Tree

Continuous Process Improvement with FMEA · TGS-2021009031

Scenario

Solder bridging is concentrated on Printer P2 during the late shift, but the causal mechanism is not yet verified.

Objective

Analyse evidence and build a defensible causal explanation for the leading defect.

Deliverable

6M Fishbone, evidence-backed 5 Whys, fault tree and cause-verification matrix

Scenario questions

1. Which cause is a mechanism rather than a label?

2. What observation would disconfirm the preferred explanation?

Submission checklist

✓	Check
■	Workbook complete
■	Formulas retained
■	Evidence and assumptions recorded
■	Questions answered
■	Acceptance criterion applied

Acceptance criterion: At least one cause is supported by a reproducible evidence test, the fault-tree logic is valid, and no conclusion relies on blame.
