TERTIARY INFOTECH ACADEMY PTE LTD

Activity 05

Build the Orion Process FMEA

Continuous Process Improvement with FMEA · TGS-2021009031

Scenario

The team must turn the SIPOC, process flow, defect evidence and RCA findings into a traceable PFMEA.

Objective

Apply structure, function and failure analysis to the scoped SMT process.

Deliverable

PFMEA header, process/function structure and at least eight complete failure chains

Scenario questions

1. Does each failure mode describe loss of a stated function?

2. Which cause-control pair lacks evidence?

Submission checklist

✓	Check
■	Workbook complete
■	Formulas retained
■	Evidence and assumptions recorded
■	Questions answered
■	Acceptance criterion applied

Acceptance criterion: Every row forms a coherent function–mode–effect–cause chain, controls are correctly classified, and evidence references are traceable.
