TERTIARY INFOTECH ACADEMY PTE LTD

Activity 06

Rate Risk, Plan Actions and Re-score

Continuous Process Improvement with FMEA · TGS-2021009031

Scenario

Several Orion rows have similar RPNs but different customer and safety consequences.

Objective

Prioritise PFMEA actions using severity-first judgement, RPN context and verified re-rating.

Deliverable

Rated PFMEA with RPN formulas, internal action-priority guardrail, owners, due dates and post-action scores

Scenario questions

1. Why can an RPN of 40 require more urgent action than an RPN of 108?

2. Which rating should change after adding only a better inspection?

Submission checklist

✓	Check
■	Workbook complete
■	Formulas retained
■	Evidence and assumptions recorded
■	Questions answered
■	Acceptance criterion applied

Acceptance criterion: All RPN formulas are correct, severe risks remain visible, actions have ownership/evidence, and post-action ratings match the control change.
