TERTIARY INFOTECH ACADEMY PTE LTD

Activity 07

Select the Improvement Portfolio

Continuous Process Improvement with FMEA · TGS-2021009031

Scenario

Orion can fund only two of five proposed improvements during the next production quarter.

Objective

Identify and compare risk-reduction opportunities using transparent criteria.

Deliverable

Opportunity register, weighted decision matrix, Pugh matrix and cost-benefit summary

Scenario questions

1. Does the top score remain top when cost weight doubles?

2. Which option prevents the cause rather than merely detecting the defect?

Submission checklist

✓	Check
■	Workbook complete
■	Formulas retained
■	Evidence and assumptions recorded
■	Questions answered
■	Acceptance criterion applied

Acceptance criterion: The recommendation traces to PFMEA risks, calculations are formula-driven, assumptions are visible and trade-offs are explicitly discussed.
