TERTIARY INFOTECH ACADEMY PTE LTD

Activity 10

Create the Process Control Plan and Review Loop

Continuous Process Improvement with FMEA · TGS-2021009031

Scenario

Orion must hand the improved SMT process back to production without losing the risk knowledge created by the team.

Objective

Translate PFMEA risks into operational controls, reaction plans and FMEA review triggers.

Deliverable

Process Control Plan, reaction plan, audit checklist, control-to-PFMEA trace matrix and review calendar

Scenario questions

1. Which PFMEA risk has no adequate operational control?

2. What event triggers immediate PFMEA review?

Submission checklist

✓	Check
■	Workbook complete
■	Formulas retained
■	Evidence and assumptions recorded
■	Questions answered
■	Acceptance criterion applied

Acceptance criterion: Every critical PFMEA risk has an owned control and reaction plan, traceability is complete, and review triggers close the learning loop.
